PROFESSIONAL SUMMARY

ML Engineer with 3+ years experience building **end-to-end production machine learning systems** that automate decisions, optimize revenue, and reduce operational risk. Expert in **Python, scikit-learn, SQL, Docker, CI/CD, Streamlit/FastAPI, AWS**. Proven delivery of **churn prediction, demand forecasting, IoT anomaly detection, and algorithmic trading automation**. Known for shipping repeatable ML pipelines with **model monitoring and measurable ROI**. {{DYNAMIC_SKILL_INJECTION}}

CORE TECHNICAL SKILLS

Machine Learning: Classification, Time-Series Forecasting (LSTM, Prophet), Anomaly Detection, Clustering, Explainability (SHAP)
MLOps: Docker, FastAPI, Streamlit, GitHub Actions, Model Registry, Drift Monitoring
Data Stack: Python (pandas, NumPy, SciPy), SQL (Optimization, CTEs), APIs, Power BI/Tableau
Cloud: AWS (SageMaker, S3, Lambda, Athena, Redshift), GCP (BigQuery), Azure basics
Practices : CI/CD, A/B Testing, Feature Engineering, Agile Product Delivery

---

PROFESSIONAL EXPERIENCE

Applied Machine Learning Engineer — Advanced Predictive Systems

Cognizant – Assigned to **Lime Micromobility (IoT Operations & Growth)**
Mar 2022 – Oct 2024 | Remote – India
• Built and deployed **churn prediction engine** reducing silent revenue leakage by enabling proactive retention actions
• Production LSTM forecasting models driving **95% SKU demand accuracy**, preventing **25% stockouts** across fleet parts
• Designed **anomaly detection** on IoT edge telemetry → **30% downtime risk reduction** for e-scooter operations
• Delivered **15M+ daily predictions** via scalable recommendation models on AWS SageMaker
• Automated analytics workflows → **60% reporting cycle time reduction**, **20+ analyst hours saved monthly**
• Launched **250+ real-time operational dashboards** driving faster defect resolution and cost-saving decisions

Impact delivered: $2.5M revenue optimization | 40% efficiency lift | 92%+ AUC fraud/retention models

---

Lead Analyst — FP&A AI Enablement

Genpact – Otis Client Engagement
Jan 2025 – Apr 2025 |Benguluru
• Developed **95% accuracy** forecast models for **$50M+ budget** planning

• Created automated **variance analysis framework → $1.2M spend prevention**
• Unified ERP + finance data via Python + SQL pipelines improving decision automation

---

ML PROJECTS — Production-Grade Portfolio

Lime IoT ML Platform (Full Lifecycle Deployment) — Business Automation

Python, scikit-learn, SageMaker, Airflow, Power BI
• Unified IoT operational data → automated risk/maintenance predictions
• KPI governance with self-service insights across Ops + Product + Finance

LLM-RAG Analytics Assistant — Intelligence Automation

GitHub: AI-40-days-of-deeksha/llm-rag-analytics-assistant
• Built **retrieval-augmented LLM** for analytics question-answering across structured + unstructured data
• Improved FP&A decision time by reducing analyst dependency and manual insights effort

Algorithmic Trading Automation — Execution Intelligence

GitHub: Manidhar8008/algo-trading-ml-automation
• Rule-based strategy (RSI + SMA) with ML signal enhancement
• Automated trade execution + Google Sheets live logging
• Demonstrated improved risk-adjusted returns during backtests

---

BUSINESS VALUE SNAPSHOT

• **15M+ ML predictions/day** powering pricing + ops automation
• **25% downtime & stockout risk reduction**
• **$2.5M revenue opportunities unlocked**
• **60% cycle time reduction** via automation
• **95% forecasting accuracy** adopted in finance

EDUCATION

Bachelor in business management — Management Information Systems
Chaitanya Deemed University – 2021 | GPA: 7.5/10

CERTIFICATIONS

PL-300: Power BI Data Analyst
Google Data Analytics
TensorFlow Developer Certificate (in progress)
AWS ML Specialty (in progress — exam scheduled)
