Remote-Only | Open to SaaS, Fintech, Mobility, Multi- AI-Driven Teams

---

PROFESSIONAL SUMMARY

Applied ML Engineer with 3+ years experience in Python, AWS SageMaker, Docker, and Kubernetes. Led the development of the Lime IoT ML Platform, processing 500k events through robust CI/CD pipelines. Proven ability to design and implement scalable backend services for data-intensive ML applications. Seeking to drive ROI at VectorShift.

CORE TECHNICAL SKILLS

Machine Learning: Classification, Time-Series Forecasting (LSTM, Prophet, Demand Forecasting), Churn Prediction, Anomaly Detection (IoT Anomaly Detection), Clustering, Explainability (SHAP), Algorithmic Trading Automation.

MLOps: Docker, FastAPI/Streamlit, GitHub Actions, Model Registry, Drift Monitoring (Model Monitoring), CI/CD, Shipping repeatable ML pipelines.

Data Stack: Python (Expert, pandas, NumPy, SciPy, scikit-learn), SQL (Optimization, CTEs), APIs, Power BI/Tableau, Feature Engineering.

Cloud: AWS (Expert, SageMaker, S3, Lambda, Athena, Redshift), GCP (BigQuery), Azure basics.

Practices: CI/CD, A/B Testing, Feature Engineering, Agile Product Delivery, Building end-to-end production machine learning systems, Measurable ROI.

PROFESSIONAL EXPERIENCE

Applied Machine Learning Engineer — Advanced Predictive Systems

Cognizant – Assigned to Lime Micromobility (IoT Operations & Growth)
Mar 2022 – Oct 2024 | Remote – India

- Built and deployed churn prediction engine reducing silent revenue leakage by enabling proactive retention actions
- Production LSTM forecasting models driving 95% SKU demand accuracy, preventing 25% stockouts across fleet parts
- Designed anomaly detection on IoT edge telemetry → 30% downtime risk reduction for e-scooter operations
- Delivered 15M+ daily predictions via scalable recommendation models on AWS SageMaker
- Automated analytics workflows → 60% reporting cycle time reduction, 20+ analyst hours saved monthly
- Launched 250+ real-time operational dashboards driving faster defect resolution and cost-saving decisions

Impact delivered: $2.5M revenue optimization | 40% efficiency lift | 92%+ AUC fraud/retention models

---

Lead Analyst — FP&A AI Enablement

Genpact – Otis Client Engagement
Jan 2025 – Apr 2025 |Bengaluru

- Developed 95% accuracy forecast models for $50M+ budget planning
- Created automated variance analysis framework → $1.2M spend prevention
- Unified ERP + finance data via Python + SQL pipelines improving decision automation

---

RELEVANT PROJECT

{{DYNAMIC_PROJECT_INJECTION}}

MY ML PROJECTS — Production-Grade Portfolio

Lime IoT ML Platform (Full Lifecycle Deployment) — Business Automation

Python, scikit-learn, SageMaker, Airflow, Power BI
• Unified IoT operational data → automated risk/maintenance predictions
• KPI governance with self-service insights across Ops + Product + Finance

LLM-RAG Analytics Assistant — Intelligence Automation

GitHub: AI-40-days-of-deeksha/llm-rag-analytics-assistant
• Built retrieval-augmented LLM for analytics question-answering across structured + unstructured data
• Improved FP&A decision time by reducing analyst dependency and manual insights effort

---

BUSINESS VALUE SNAPSHOT

• 15M+ ML predictions/day powering pricing + ops automation
• 25% downtime & stockout risk reduction
• $2.5M revenue opportunities unlocked
• 60% cycle time reduction via automation
• 95% forecasting accuracy adopted in finance

EDUCATION

Bachelor in business management — Management Information Systems
Chaitanya Deemed University – 2021 | GPA: 7.5/10

CERTIFICATIONS

PL-300: Power BI Data Analyst
Google Data Analytics

TensorFlow Developer Certificate (in progress)
AWS ML Specialty (in progress — exam scheduled)
